ABOUT US

The Artesia Chamber of Commerce is comprised of businesses working together to make Artesia a better place in which to live, work, and do business. We are an organization committed to improving the economic climate and quality of life in Artesia, California.

Artesia is one of Southern California's most culturally diverse cities. Anyone who visits here will see the many small businesses, grocery marts, restaurants, and clothing stores that have created such a vibrant identity. To live and do business here requires an openness to other cultures, which studies show, spurs economic growth. We at the Artesia Chamber of Commerce believe that our diversity is our strength.

Our Chamber Board is made up of local business owners, non-profit administrators, and community activists all working to help you make connections, advocate for your needs, and grow your business. We are a strong, civically engaged organization committed to a thriving business community, but we're missing something- YOU!

OUR MISSION

To promote a thriving economic climate for all businesses and a better quality of life for all residents in Artesia.

We foster better relations between government and business, create partnerships, and provide opportunities for businesses to give back to the community.
